BASIC INFORMATION

Core identification information for the metadata record

Title: Monitoring, Coastal (UAV) (2022)

Country: Albania (alb)

Abstract: Photography of the coastline of the Republic of Albania with "UAV" technology. This data set will be used by ASIG and the public authorities responsible for monitoring and controlling development along the coastline during the tourist season as well as for the control and future development of the coastline. Since the photography method is with the panoramic method, it should be used for identification purposes and not for cartographic purposes. Each photograph contains the date and time of image capture which you can consult by obtaining information at any point. The data does not belong to the topics of geoinformation according to law 72/2012 and consequently there are no defined standards.
