BASIC INFORMATION

Core identification information for the metadata record

Title: Monitoring of tap water quality

Country: Serbia (srb)

Abstract: The indicator monitors the share of drinking water samples that do not meet the prescribed values of drinking water parameters in the total number of drinking water samples obtained from public water supply systems. The indicator provides information on the risks of negative impacts of drinking water on human health and shows to what extent the supply of drinking water is in accordance with sanitary and hygienic conditions and standards. Qualitative indicators of health impact from environmental sources are determined as the risk of exposure to microbiological agents and physico-chemical agents, so that they never exceed the maximum allowed concentrations.

It is determined:

1. The average value of the percentage of physico-chemical defects and the level of risk for the period 2012-2021. year
2. The average value of the percentage of microbiological defects and the level of risk for the period 2012-2021. year
3. The value of the percentage of physico-chemical defects and the level of risk for the year 2021
4. The value of the percentage of microbiological defects and the level of risk for the year 2021

CLASSIFICATION AND KEYWORDS

Categorization and keyword information

Topic Categories: environment, health

Keywords: [National Quality Tap water](#)

GEOGRAPHIC INFORMATION

Geographic extent and bounding box

Bounding Box: Not specified

Coordinate Reference System: <https://epsg.io/4326>

TEMPORAL INFORMATION

Temporal coverage and dates

Temporal Extent: 2022 - 2024

Publication Date: 1970-01-01

Creation Date: 1970-01-01

Last Revision Date: 2024-04-09

QUALITY AND CONFORMANCE

Data quality and standards conformance

Lineage / Provenance: Water sampling, analysis of samples and preparation of expert opinions on sanitary cleanliness are carried out by a network of institutes/institutes for public health. The consolidated report and publication of data at the level of the Republic of Serbia is prepared by the Institute for Public Health of Serbia, Dr. Milan Jovanović Batut.

Spatial Resolution: 100000

Specification: ISO 19139

Degree of Conformance: Conformant

ACCESS AND DISTRIBUTION
