QUALITY AND CONFORMANCE

Data quality and standards conformance

Lineage / Provenance: The Generic Land Cover Map is a presentation of the classified content of biophysical phenomena on the Earth's surface. The map was made for the territory of the Republic of Serbia using SPOT 5 satellite images with a resolution of 10 m collected in 2011. Ten basic classes are classified: Artificial surfaces, Bare soil, Agricultural land, Grassland, Shrubland, Deciduous forests, Mixed forests, Coniferous forests, Wetland and Water surfaces. Based on the control points collected for the entire territory of the Republic of Serbia using independent sources, a general accuracy assessment of the Generic Land Cover classes was performed and amounts to 86.16% for the entire territory of the Republic of Serbia.

Spatial Resolution: 50000

Specification: ISO 19139

Degree of Conformance: Conformant
